Instrumentation Fitting Solutions...

GSTIN No.: 27AMHPM9522A1Z6

[www.loktechengineers.com](http://www.loktechengineers.com)

**Lok-Tech Engineers** is one of India's leading Instrumentation Tube / Pipe fittings, Needle, Ball & Manifold Valve manufacturer in house modern facility CNC machining centering, Auto screw Machine, Plating ,forging etc, offering an extensive range of Tube Fittings & Valves with as our brand name.Lok-Tech Engineers, and are manufactured as per customer specifications or based on technical data of reputed competitors.

Offering complete solution to our clients viz, from conceptualization to final installation, we have earned a long list of satisfied clientele. Apart from our superior infrastructure facilities, we leverage on the skills of our engineers as well as in-house quality control equipment, which help us to meet the exacting product requirements of our clients.

WE also manufacture turned SS, Brass, and Aluminum and MS material part as per customer drawing or requirement.

Lok-Tech Engineers believes in total satisfaction of the customer with mutual understanding and lasting trust we therefore incessantly strive to provide our customer the highest quality standard and ultimately the highest quality standards and ultimate the highest level of customer's satisfaction.

Before manufacturing, raw materials are tested for their composition and properties by Neutral Inspection Laboratories for the conformation to their respective standards and only then the manufacturing is done.

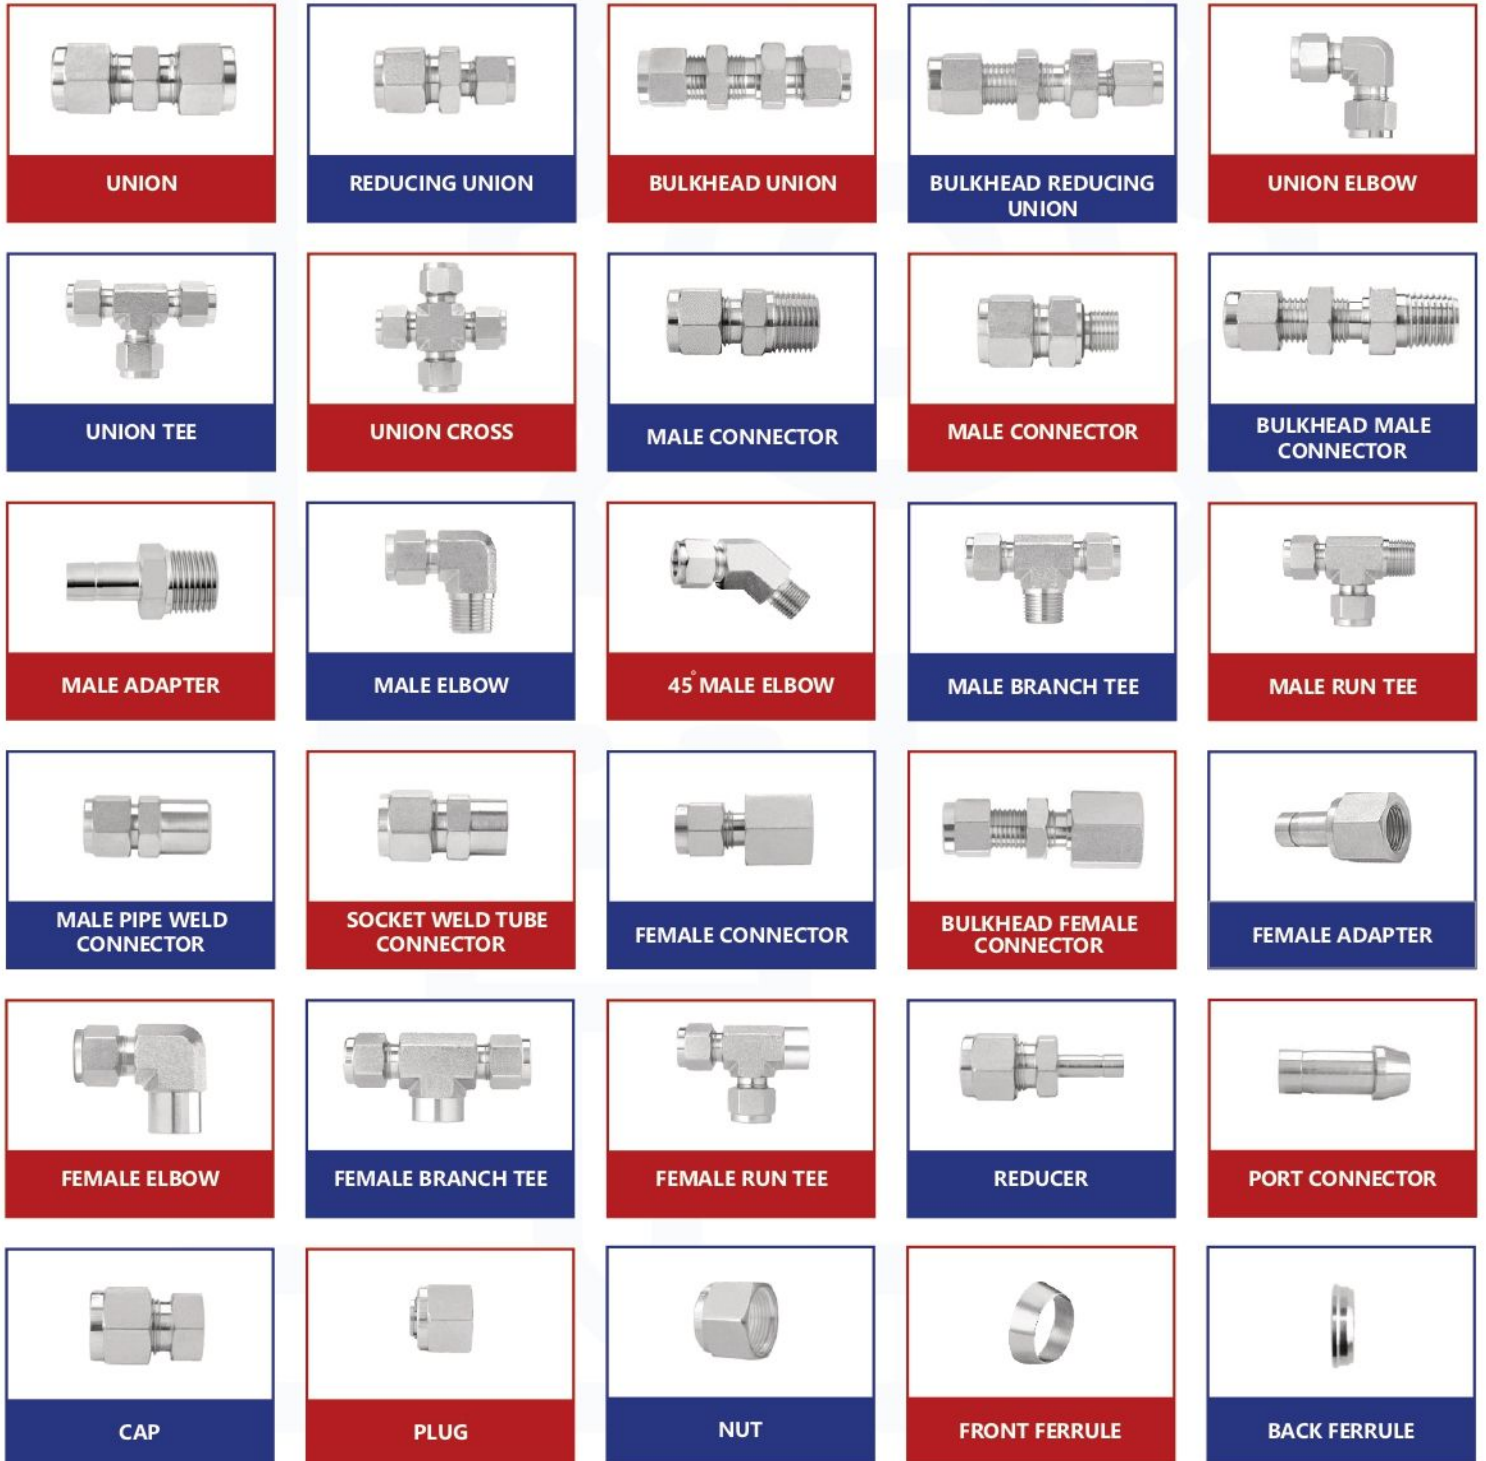

Total accuracy in production and quality is maintained through the use of different measuring instruments and inspection gauges. All our products are 100% inspected – whether Fittings or Valves for their dimensional accuracy within the tolerance levels. Instrumentation Valves are 100% Hydro-Tested in the factory to check their compliance at the required working pressure, prior to dispatch.

We lay complete emphasis on the quality of our products at each stage of the production process. Our quality conscious approach has enabled us in achieving, which is testimony for our quality. Our in house quality check lab ensures to check the quality of our products on the following physical, mechanical and technical aspects like-

- Material Composition Test
- Tensile Test
- Non Destructive Tests
- Torque Test

## Double Ferrule Compression Tube Fittings

**MOC** : Stainless Steel / Carbon Steel / Alloy Steel

**End Connections** : NPT / BSP / BSPT / UNF / METRIC / SW / Plain

**Size** : 1/8" to 2" ; 3mm to 50mm OD

**Pressure Rating** : Upto 9000 PSI

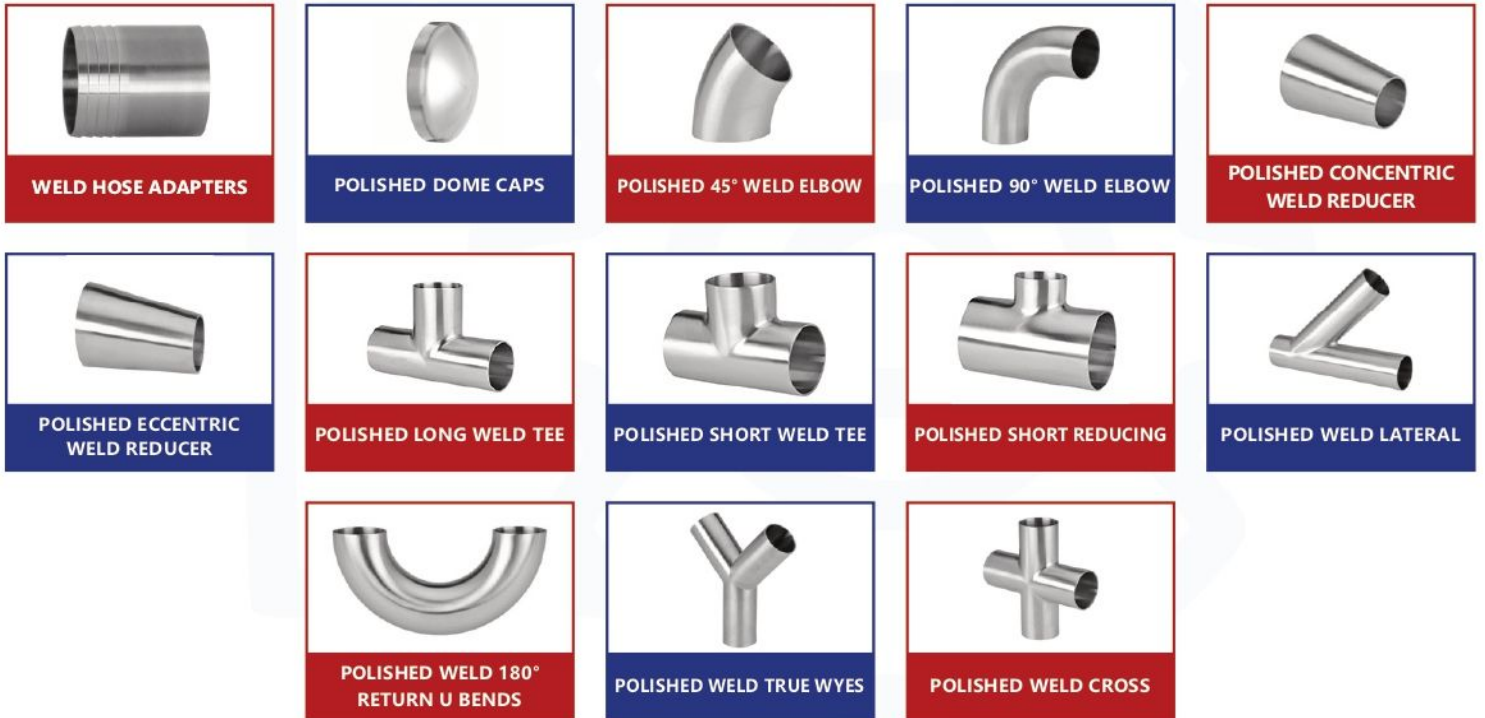

## VCR Fittings

## ULTRA-TORR Fittings

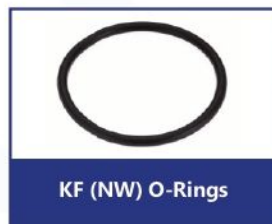

## Butweld Fittings

## ISO Fittings & Flanges

## Vaccum Fittings

## ConFlat Fittings
